

A New Twist On Lure Connectors

QUICKSWIRL, an instant lure connector, is now available online and in stores, including Cabela's.

An alternative to snap swivels, Quickswirl is easy to use. To attach a lure, simply place the eye of the lure onto the end of the exposed coil and swirl it onto the base. Removing the lure is just as easy; simply reverse the process.

The lure connector is made of stainless steel wire specifically designed for abrasion resistance. It has been torsion straightened and treated for added durability.
